

approx. 8. storage places (max. stack height 2.0m)
 optimal storage utilization with 1.7m stack height approx. 904 panels
 average thickness 15mm

Fundament:
 Min. Betondicke = 200mm
 Betonqualität C25, zug- und druckbelastbar
 Fundament muss ebenerdig sein (± 10mm)

Fondations:
 Épaisseur mini de béton = 200mm
 Qualité de béton C25, résistant à la traction et à la pression
 Les fondations doivent être planes (± 10mm)

Fondazione:
 Spessore min.pavimento = 200mm
 Qualità pavimento C25, sollecitabile a trazione e compressione
 Fondazione piana (± 10mm)

Foundation:
 Min. concrete thickness = 200mm
 Quality on concrete C25, tension- and pressure loadable
 Foundation has to be at ground level (± 10mm)

Fundamento:
 Capa de hormigón, mín. = 200mm
 Calidad del hormigón C25, resistente a la tracción y compresión
 El fundamento deberá quedar al nivel del suelo (± 10mm)
